Captain A. F. Johnson, USN  
Armed Forces Staff College

Dear Captain Johnson:

In response to your letter of 12 February 1958 in which you requested a map showing the ethnography of the Balkans, I am sorry to report that our search has not been too fruitful.

As you can see from the attached maps, the data are either too old to be of any use or are presented in such general terms as to limit their use for your problem purposes. I seriously doubt whether any of the enclosed maps would be of sufficient value for Problem 5 use to consider their reproduction in quantity.

It is fairly obvious that some competent individual needs to undertake the study of ethnographic patterns in the Balkans and have the results of the study plotted on a map which could be reproduced. If such work is done and there remains the problem of reproduction of the map in quantity, I should be pleased to consider reproducing the map for your use as well as our own. I would want, however, to be assured that the maps were of sufficient quality to be reproduced and distributed.

If I can be of further assistance to you in this matter, please do not hesitate to write to me at my office. Please remember me to Col. Nichols and give my best regards to other members of the faculty and staff with whom I associated during a pleasant five months at the College.

Sincerely,

25X1A9a

Chief, Geographic Research
